-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-29 and 53-55, in Paper No. 10 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-15, 17-22, 24-27, 29 and 53-55 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Field.

Regarding claim 2, the inner and intermediate layers attached to the inner surface of outer layer in the Field container meet applicant's recitation of "the patch is attached to the inner surface of the back wall."

Regarding claim 3, the outer and intermediate layers attached to the inner surface of inner layer in the Field container meet applicant's recitation of "the patch is attached to the outer surface of the back wall."

Regarding claim 54, the intermediate layer in the Field container meets applicant's recitation of "the patch is located between the inner and outer surface of the back wall."

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Field.

Field discloses the claimed invention, especially the inner and intermediate layers opposite the opening comprising a first layer, a second layer and a third metalized layer (AL/PET). See "TABLE I, SAMPLE D". However, it is unclear if the metalized layer attached to the first layer opposite the second layer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to attach the metalized layer of Field to the first layer opposite the second layer, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

6. Claims 23 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Field.

Field discloses the claimed invention, especially the second layer (inner layer 11) being low density polyethylene. However, Field does not disclose the thickness of the second layer being approximately 0.0005 inches. It would have been an obvious matter of design choice to a person having ordinary skill in the art at the time the invention was made to provide the second layer of Field as approximately 0.0005 inches thick, since such a modification would have involved a mere change in the size of a component. A

change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
